

THE 30-MINUTE E-COMMERCE AUDIT

Find the leaks in your online store — before you spend on ads.

Whether you're on Shopify, WooCommerce, Wix, Amazon, eBay or Etsy — this worksheet walks you through the 30 highest-leverage checks. Most stores can find 3-5 immediate wins in under an hour.

How to use this audit. Open your store in another tab. Walk through each section. Tick boxes you pass. Note specific items you don't — that's your shortlist for the next 30 days.

1. STOREFRONT FUNDAMENTALS

The first 7 seconds. Most carts are lost before the customer even browses.

- Page loads in under 3 seconds on mobile (test on a real 4G connection).
- Hero clearly states what you sell and to whom (not just "Welcome").
- Logo, navigation and search are visible without scrolling.
- There is a visible value proposition (e.g. shipping, returns, guarantee).
- Phone, email or chat is visible on every page.

2. PRODUCT PAGES

Product page conversion rate is the single biggest lever in e-commerce.

- Every product has at least 4 photos including a lifestyle shot.
- First photo is on a clean background (Amazon requires this — others reward it).
- Product title follows a documented format (brand · product · attribute · size).
- Description leads with benefits, not specifications.
- Reviews are visible above the fold (or social proof if you're new).
- Stock status and shipping ETA are honest and visible.
- Cross-sells / bundles are shown but don't crowd the buy button.

3. CART & CHECKOUT

Industry average cart abandonment is ~70%. Each removed step lifts conversion.

- Guest checkout is available (no forced account creation).
- Shipping cost is visible **before** the customer enters card details.
- At least 3 payment methods are offered (card + wallet + one local).
- Checkout is a single page (or 2 steps max).
- Form fields are reduced to the minimum (no "how did you hear about us" at checkout).
- Abandoned-cart email/SMS is configured and triggered within 1 hour.

4. MARKETPLACES (AMAZON, EBAY, ETSY)

Marketplaces are a different game. The algorithm is your customer.

- Listing titles are front-loaded with the most-searched keywords.
- Bullet points are written for the algorithm *and* the buyer.
- Backend keywords / search terms are filled (Amazon, eBay).
- A+ Content / Enhanced Brand Content is in place (if eligible).
- Review velocity is monitored weekly (drop > 0.2 stars is a red flag).
- FBA / fulfilment SKUs are sized to demand, not just stocked once.
- Pricing tracks competitors automatically (manual price wars lose).

5. ACQUISITION & RETENTION

Repeat customers are 5x cheaper than acquired ones — but most stores under-invest in them.

- We collect emails before checkout (welcome pop-up or footer form).
- Email open rate is > 25% and click rate > 2%.
- We have at least one SMS or WhatsApp channel collecting opt-ins.
- Reviews are requested automatically 7-14 days post-delivery.
- Repeat-customer rate is measured monthly.
- We segment customers (VIPs, lapsed, new) and treat them differently.
- We know our Customer Lifetime Value with reasonable confidence.

YOUR SCORE

Count the boxes you ticked across all five sections (32 total).

Score	What it means	Suggested next move
26 — 32	Mature store	Optimise margins, expand channels.
18 — 25	Working but leaking	Fix product pages + checkout first.
10 — 17	Tactical only	Re-platform decisions become unavoidable.
0 — 9	Foundational issues	Start with positioning + storefront basics.

WHAT'S NEXT

Free 30-minute store walk-through. We'll share-screen with you, go through your store live, and identify the three highest-impact fixes you can ship this week. No deck. No pitch. No commitment. Book at mirconsulting.com/contact.
