

THE 15-MINUTE MARKETING QUICK-CHECK

Is your marketing actually compounding?

Run this worksheet on your own business in 15 minutes. Score yourself honestly. Then book a free 30-minute discovery call with MIR Consulting and we'll walk you through the three highest-leverage moves for the next 90 days — at no cost, no commitment.

How to use this worksheet. Tick the boxes you can answer with a confident yes. Leave the rest blank. Count unticked boxes. That's your improvement surface.

1. POSITIONING & MESSAGING

If you can't say it in one sentence, prospects can't repeat it.

- We can describe our offer in one sentence a 12-year-old would understand.
- We have a documented Ideal Customer Profile (industry, size, role, pain).
- Our homepage hero clearly states **who we serve** and **what changes** for them.
- We have at least 3 named competitors and know how we're different from each.
- Our pricing strategy is intentional (not just a number we settled on).

2. ACQUISITION CHANNELS

Most businesses leak revenue because they treat marketing as a series of unrelated experiments instead of a portfolio.

- We know our top-3 channels by **contribution to revenue** (not just clicks).
- We know our blended CAC and LTV — and the ratio is documented.
- We have an organic engine (SEO, content, or referral) that isn't paused.
- We have a paid engine with a documented daily/weekly spend cap.
- We can name a specific channel we've tested in the last 90 days.
- We retire under-performing channels rather than letting them rot.

3. BRAND, CONTENT & SOCIAL

Your brand isn't your logo — it's the consistent experience a stranger encounters across every touchpoint.

- Our visual identity is documented (colours, type, logo usage).
- We publish on at least one channel weekly without breaking cadence.
- Our content has a documented angle (e.g. "the practitioner POV", not generic).
- We repurpose long-form content into 3+ shorter formats.
- Our email list grew in the last quarter, with a measurable open rate > 25%.

4. FUNNEL & CONVERSION

Acquisition without conversion is theatre. This is where most growth actually hides.

- Our website's conversion rate (visit → enquiry) is measured monthly.
- We A/B test at least one element of the conversion path each quarter.
- We have a documented hand-off between marketing and sales/customer-care.
- We follow up with new leads within 1 business day, every time.
- We have a written nurture sequence for leads that don't convert immediately.
- We measure churn / repeat-purchase rate, not just first sale.

5. MEASUREMENT & DECISION-MAKING

If marketing isn't on the same weekly review as ops and finance, it will always lose budget battles.

- We have one weekly marketing dashboard reviewed by leadership.
- We can attribute revenue to a campaign or channel within 30 days.
- Our key marketing KPIs are written down (and not just "more traffic").
- We've made one decision in the last 90 days that was driven by data.
- Our marketing budget is sized against a target — not last year's number.

YOUR SCORE

Count the boxes you ticked across all five sections (28 total).

Score	What it means	Suggested next move
22 — 28	Mature marketing engine	Optimise. Quarterly strategy review.
15 — 21	Working but leaking	Audit funnel + measurement first.
8 — 14	Tactical, not strategic	Pause. Re-position. Then re-build channels.
0 — 7	Marketing is incidental	Start with positioning + one channel.

WHAT'S NEXT

Free 30-minute discovery call. Bring this worksheet. We'll spend 30 minutes — no slide deck, no pitch — walking through your three biggest unticked boxes and turning them into a 90-day action plan. No commitment to engage afterwards. Book at mirconsulting.com/contact.
